IN THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

- 1 1. (currently amended) A method for registering at least one wireless access point in
- 2 a wireless local area network (WLAN) wireless area network (WAN), comprising:
- broadcasting, from a WLAN WAN gateway, a discovery message to said at least
 one wireless access point in said WLAN WAN;
- 5 receiving at said <u>WLAN WAN</u> gateway, from at least one wireless access point
- 6 receiving said discovery message, an access point registration request comprising access
- 7 point location, IP address, MAC address, radio type, and power level information of said
- 8 wireless access point; and
- 9 storing said access point registration request information at said WLAN <u>WAN</u>
 10 gateway.
- 1 2. (currently amended) The method of claim 1, wherein each wireless access point
- 2 selects a random delay prior to sending said access point registration request to said
- 3 broadcasting WLAN WAN gateway.
- 1 3. (currently amended) A method for registering at least one a wireless access point
- 2 in a wireless local area network (WLAN) wireless area network (WAN), comprising:
- broadcasting a gateway discovery query message from said at least one wireless

 description:
- 5 receiving, from at least one WLAN WAN gateway, a respective service discovery
- 6 message;
- 7 selecting, by said wireless access point, an appropriate WLAN WAN gateway in
- 8 an instance where more than one service discovery message is received; and

- 9 sending an access point registration request comprising access point location, IP
- 10 address, MAC address, radio type, and power level information of said wireless access
- 11 point to said selected WLAN WAN gateway.
- 1 4. (previously presented) The method of claim 3, wherein said selecting further
- 2 comprises:
- 3 determining if said wireless access point is currently registered; and
- 4 sending said service discovery message to said wireless access point.
- 1 5. (currently amended) The method of claim 3, wherein said selecting comprises:
- 2 determining an appropriate WLAN WAN gateway using at least one of the
- 3 following: a cost of using a WLAN WAN gateway, a load at a WLAN WAN gateway,
- 4 and system features provided by a WLAN WAN gateway.
- 1 6. (original) The method of claim 3, wherein said sending an access point
- 2 registration request further comprises sending security information in said access point
- 3 registration request.
- 1 7. (currently amended) The method of claim 6, wherein each wireless access point
- 2 selects a random delay prior to sending said access point registration request to said
- 3 WLAN WAN gateway.
 - 8. 32. (canceled)
